

HashMap< String, XPathExpression >

TemporaryFolder

sectionExpressions

tempFolder

org.mitre.synthea.export.
CCDAExporterTest

```
graph BT; A[org.mitre.synthea.export.CCDAExporterTest] -.->|sectionExpressions| B[HashMap<String, XPathExpression>]; A -.->|tempFolder| C[TemporaryFolder];
```

The diagram illustrates a class hierarchy or field access. At the bottom is a gray box representing the class `org.mitre.synthea.export.CCDAExporterTest`. Two dashed purple arrows originate from this class. One arrow, labeled `sectionExpressions`, points to a white box containing `HashMap< String, XPathExpression >`. The other arrow, labeled `tempFolder`, points to a white box containing `TemporaryFolder`.
